1 VMTP: a transport protocol for the next generation of communication 95%

systems

D Cheriton

**Proceedings of the ACM SIGCOMM conference on Communications architectures & protocols** September 1986

The Versatile Message Transaction Protocol (VMTP) is a transport-level protocol designed to support remote procedure call, multicast and real-time communication. The protocol is optimized for efficient page-level network file access in particular. In this paper, we describe the significant aspects of the VMTP design, including the VMTP treatment of sessions, addressing, duplicate suppression, flow control and retransmissions plus its provision for multicast. The VMTP design refle ...
